

Fall 2017

Dear Families,

We are excited to implement a new web-based curriculum called MobyMax in our district classrooms to support personalized learning and academic success. MobyMax is tailored to your student's individual needs, and I think you will be impressed by how fast your child will excel while using Moby. Moby's features include:

- Placement tests that accurately identify where your child excels, and where his or her "missing skills" are
- Targeted instruction to "fill in" those missing skills
- Systematic review sessions that ensure that your child retains 100% of what he or she has learned

Best of all, your child can access Moby from your home computer via any internet browser at any time.

Login details: <https://clever.com/in/usd383>

- Kindergarten and First Grade Students – user name and password both are Student Number and Student Number.
- 2nd – 6th Students - user name Student Number and password is mascot18; ie: panda18
- Middle and High School Students - same format as their Infinite Campus username StudentNumber and password Initials + DOB (mmddyy) - i.e. tb060283

Once logged in, your child will immediately start the lessons and begin improving his or her missing skills.

From some of the log-in screens, there's a sign in as a parent as well by selecting "As a Parent" and entering your child's username and password. You will be able to monitor your child's progress and even send messages to the teacher.

In conclusion, one of the biggest benefits of digital education is the ability to differentiate instruction based on the needs of each student. Again, Moby automatically assigns lessons to each student based on their diagnostic results, ensuring that students practice the skills they need to work on without spending time on skills they have already mastered. Moby will also quickly move a student to new material once they demonstrate mastery of a skill or assign additional problems if a student needs more practice.

Sincerely,

Lucas Shivers * Director of Elementary Education
